## HOWA LIGHTNING RIFLES

### RIFLES & BARRELED ACTIONS

**H**OWA RIFLES have proven to be the equal of any produced in the U.S.A. today. Their rugged Mono-block receivers are machined from a single billet of high carbon steel.

The machined steel bolt boasts dual opposed locking lugs and triple relief gas ports. Actions are fitted with a button release hinged floor plate for fast, safe unloading.

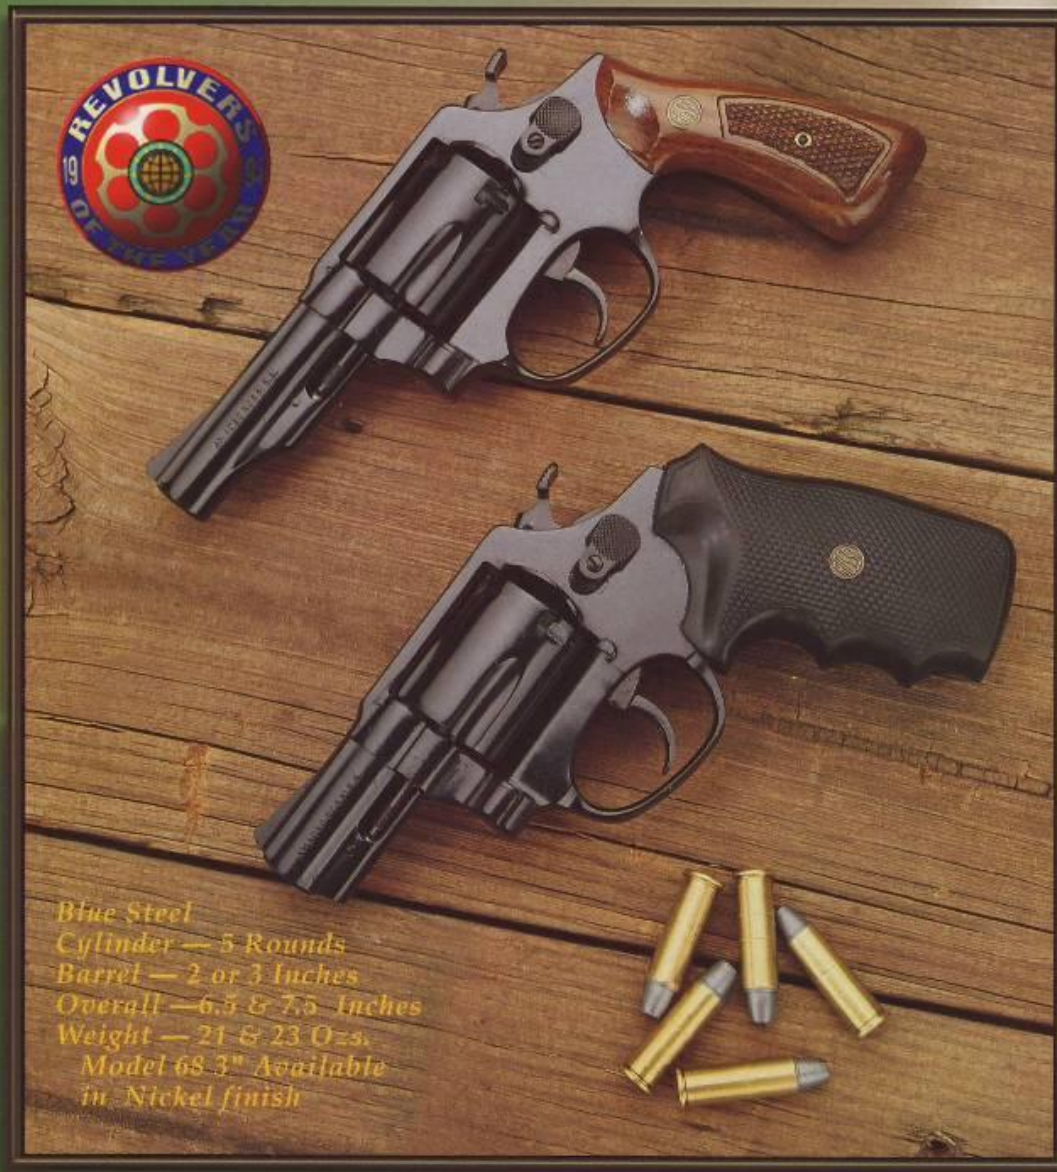

Standard scope mounts and premium steel sporter

weight barrels are hammer forged, proofed and tested for precision accuracy. A silent, sliding thumb safety locks the trigger for safe loading or clearing the chamber of live rounds. You'll like the ultra-tough polymer stock. It's designed to stand up under even the most severe rough country tracking . . . in any climate.

Join the "tight group" group . . . get a HOWA.

**NINE CALIBERS:** .223, .22-250, .243, .270, .308, .30-'06

Overall — 6.5 & 7.5 Inches  
Weight — 21 & 23 Ozs.  
Model 68 3" Available  
in Nickel finish*

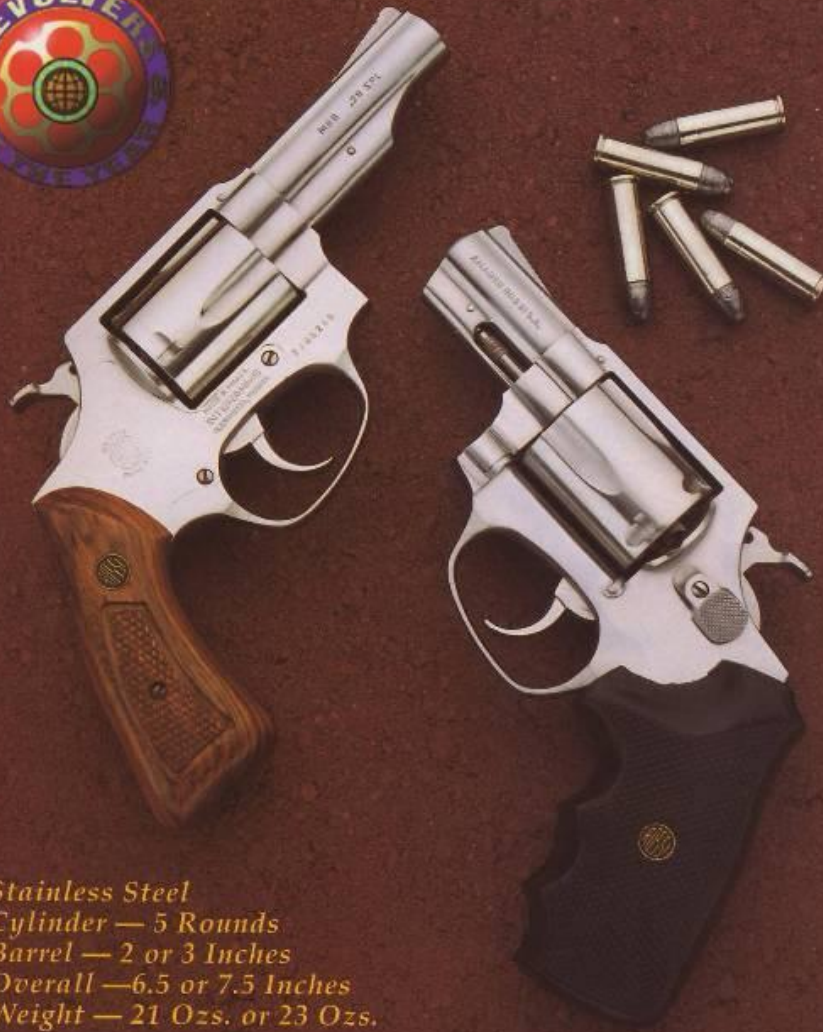

## MODEL 68 CALIBER .38 SPECIAL

UNEQUALED value for sport or personal protection, the Rossi small frame M68 offers the two barrel lengths popular with the Police for undercover or off duty use. The 2" M68 is available with your choice of either traditional checkered wood or the contoured, rubber wraparound combat style. The three inch barreled version is supplied with wood only. You'll like the balance provided by the ex-

tended ejector rod housing. With their compact 5 shot cylinders, trim ramp front sight and low profile recessed rear sight channel, the M68's are designed for maximum carrying comfort.

These functional features and an uncomplicated, user friendly design have also made the small frame M68 and M88 revolvers extremely popular with the growing number of female gun owners.

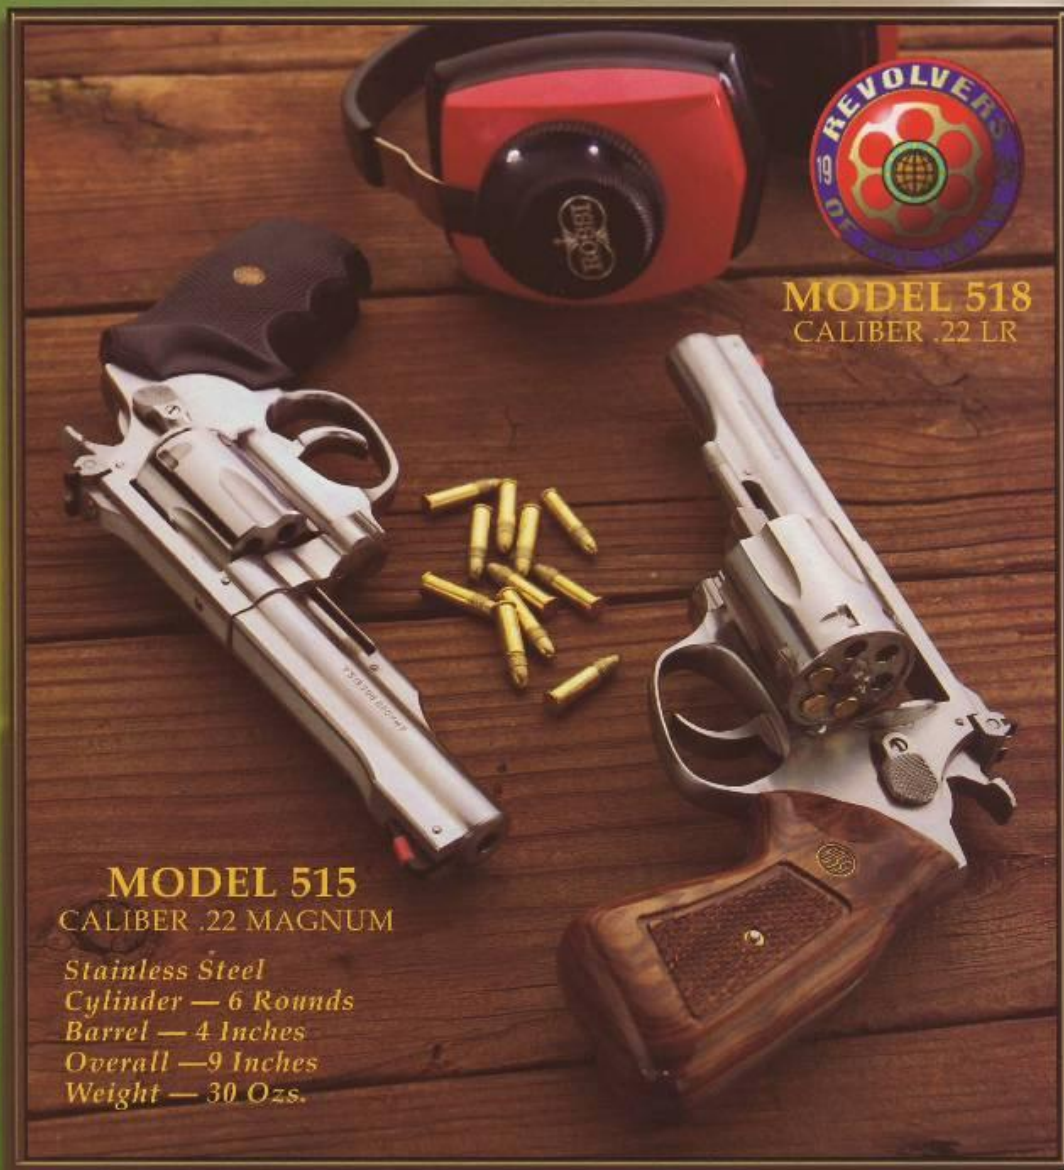

*Stainless Steel  
Cylinder — 5 Rounds  
Barrel — 2 or 3 Inches  
Overall — 6.5 or 7.5 Inches  
Weight — 21 Ozs. or 23 Ozs.*

## MODEL 88 CALIBER .38 SPECIAL

ALL the plus features of the M68 are found in its stainless steel twin—the M88. With a frame forged from high tensile 400 Series, heat-treated stainless steel, the M88 is built to withstand hard use and rough weather. Their rust resistant qualities make these a perfect choice for hunters, fishermen, backpackers and law en-

forcement officers. You may choose either checkered wood or the rubber wraparound combat type grip with the two inch model—three inch in wood only. Whatever your choice, you'll agree with those experts who believe Rossi revolvers are the best value on the market today.

**MODEL 518**  
CALIBER .22 LR

**MODEL 515**  
CALIBER .22 MAGNUM

*Stainless Steel*  
*Cylinder — 6 Rounds*  
*Barrel — 4 Inches*  
*Overall — 9 Inches*  
*Weight — 30 Ozs.*

## SMALL BORE REVOLVERS

**T**WO OF THE slickest little revolvers to come along in years. Two tough little stainless steel beauties built to go anywhere and built to last. The Model 518 is chambered for the economical .22 LR cartridge and, for a bit more authority, the Model 515 handles .22 Magnum rounds.

Forged from rust-resistant stainless steel, they're the answer to an outdoorsman's prayers. Backpackers and fishermen shouldn't be without one.

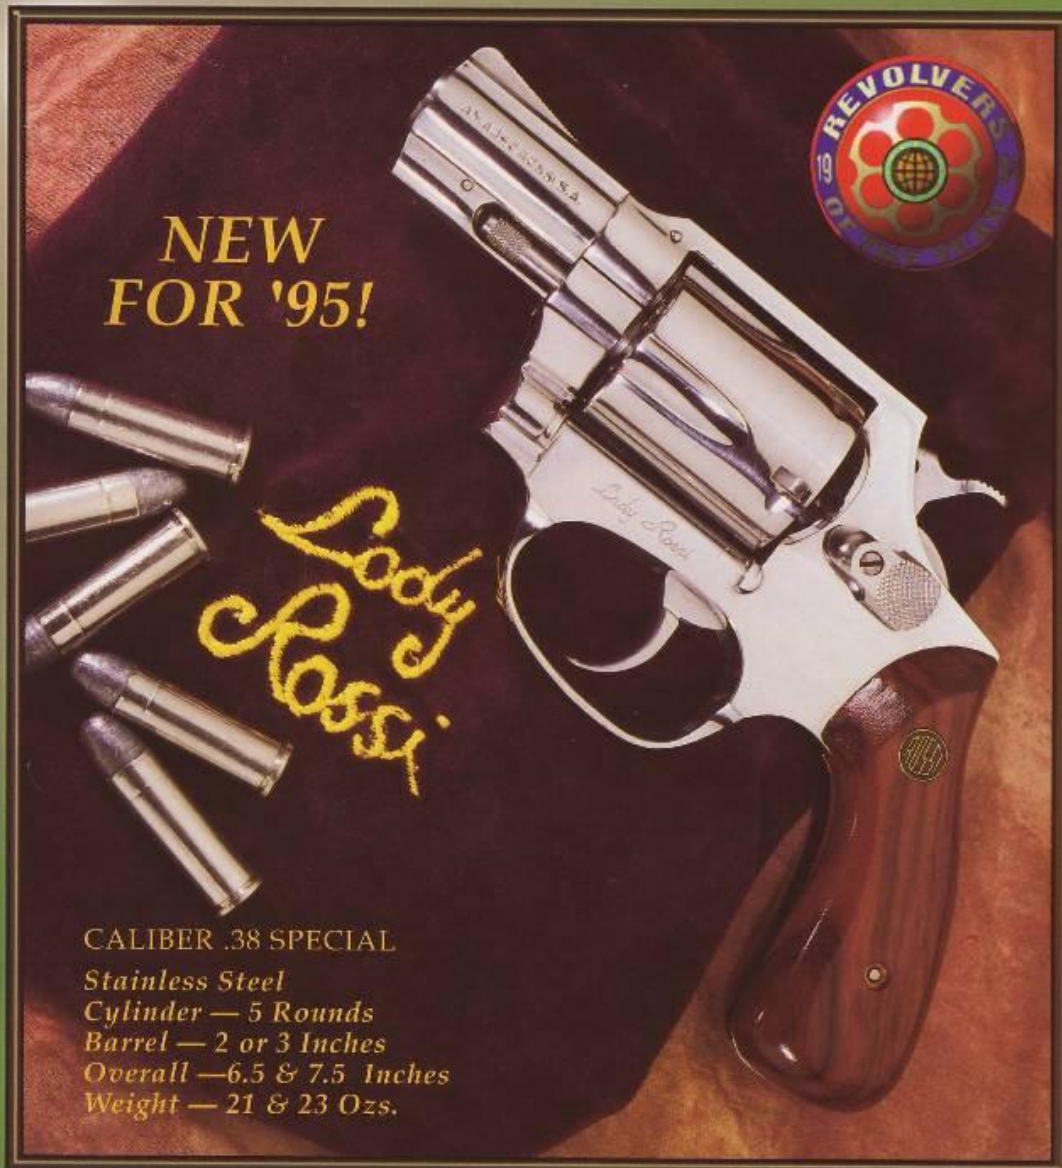

Built on a small frame with a six shot cylinder, these .22's share all the rugged attributes

of Rossi big-bore revolvers. Sporter weight barrels with a sturdy integral sight rib and ejector rod shroud provide excellent balance for instinctive aiming and target control.

Ramp front sights are fitted with a contrasting black sight blade with a red insert. Square-notch rear sights—also contrasting black—are fully adjustable for elevation and windage. You'll want to own this pair and, as an added incentive, both are delivered with *two* pairs of grips—traditional checkered wood or rubber wraparound style.

Here's something to get hold of.

**NEW  
FOR '95!**

*Lady Rossi*

CALIBER .38 SPECIAL  
*Stainless Steel*  
Cylinder — 5 Rounds  
Barrel — 2 or 3 Inches  
Overall — 6.5 & 7.5 Inches  
Weight — 21 & 23 Ozs.

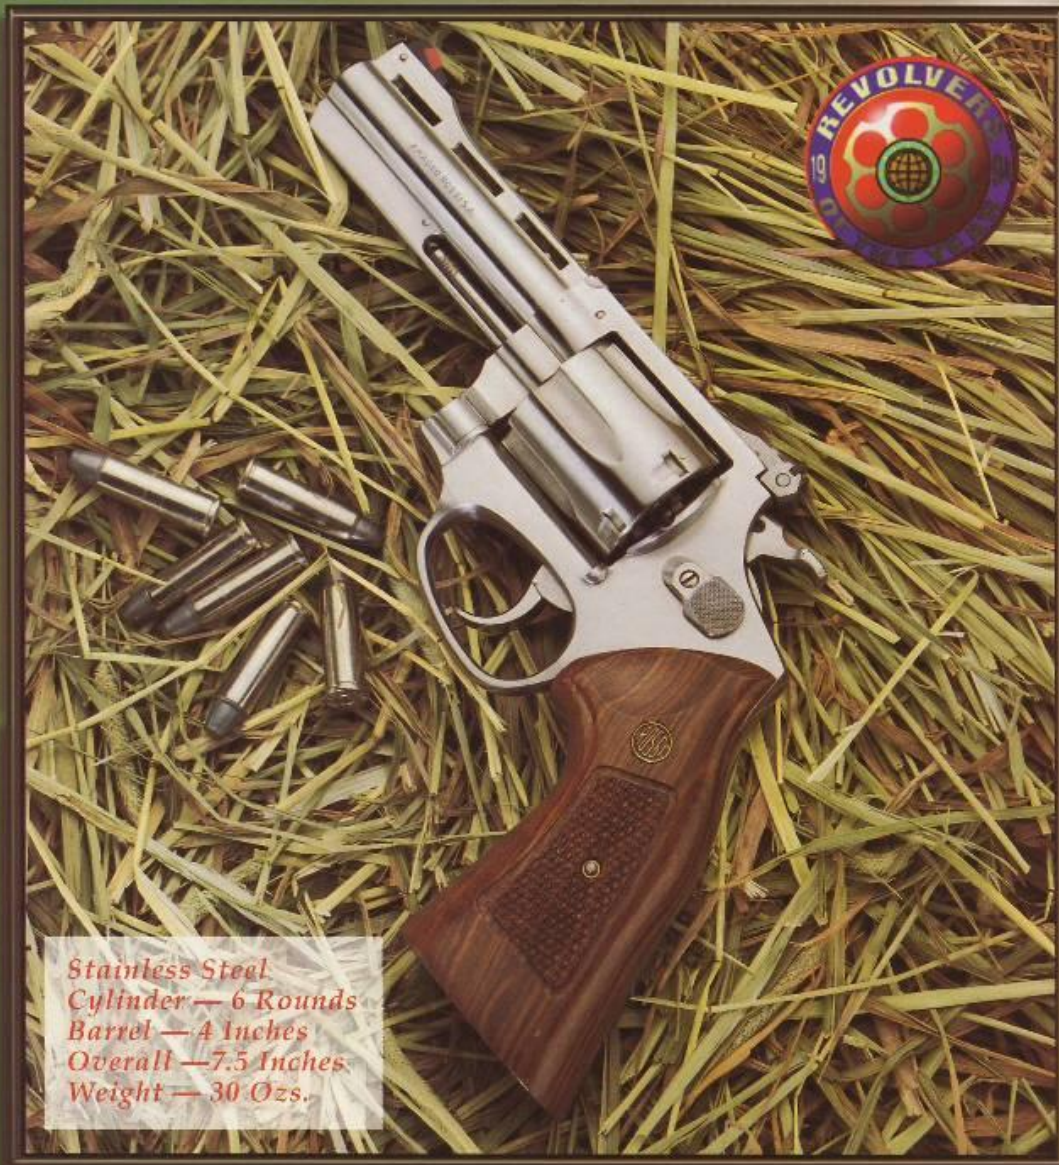

## THE LADY ROSSI

Rossi has always wanted to see more women interested in the shooting sports, so they have introduced the "Lady Rossi." It is designed with both the inexperienced and experienced shooter in mind. The Lady Rossi, produced with highly polished stainless steel, provides you with ultra-compact and lightweight protection. Add the fixed sights, smooth rosewood grips and soft

velvet bag and you have a package that will meet most of your needs.

The Lady Rossi has a 5-shot cylinder chambered for the .38 Special to offer you not only the firepower you need but with a recoil that is easy to handle. Whatever your need, you owe it to yourself to try the new Lady Rossi. You'll find it to be the perfect fit.

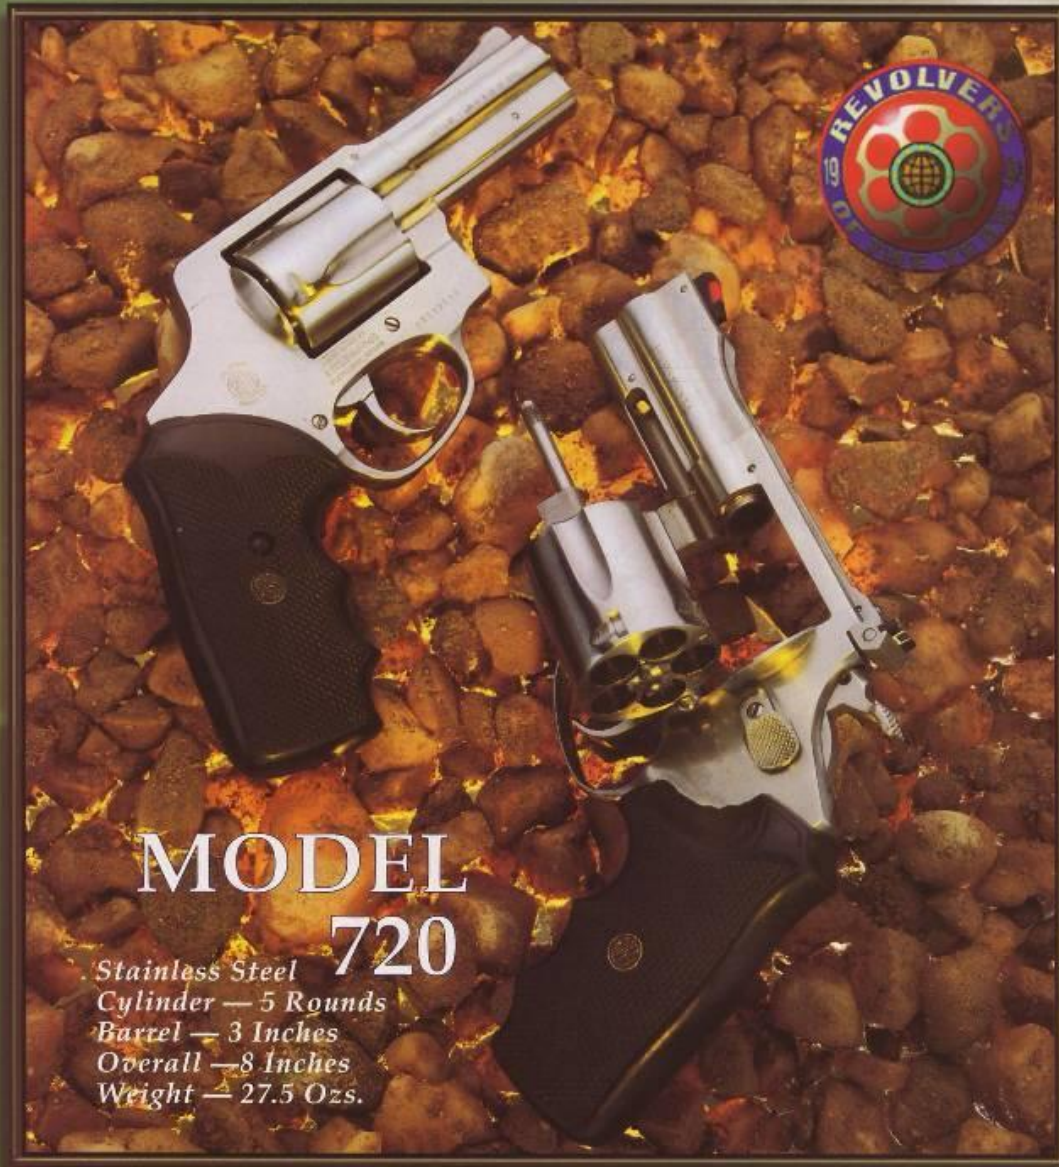

*Stainless Steel  
Cylinder — 6 Rounds  
Barrel — 4 Inches  
Overall — 7.5 Inches  
Weight — 30 Ozs.*

## MODEL 851 CALIBER .38 SPECIAL

**V**ALUE and performance ... two big plus factors built into all Rossi products . It's set up to meet your requirements for target precision and reliable service. You can depend on solid long life construction with the high tensile strength of Rossi's heat treated Series 400 stainless steel. The ventilated rib provides a broad, glare free sight plane. The square notched rear sight is outlined in white and fully adjustable for

both windage and elevation. A classic ramp front sight is fitted with a red insert. The full length shrouded ejector rod adds forward weight for extra stability for sport marksmanship and personal protection. If you're looking for one all purpose, all weather revolver that's long on quality and short on price—take a good look at the M851—we think you'll take one home.

## MODEL 720

*Stainless Steel*  
 Cylinder — 5 Rounds  
 Barrel — 3 Inches  
 Overall — 8 Inches  
 Weight — 27.5 Ozs.

### CALIBER .44 SPECIAL

**R**ECOGNIZING the consumer demand for a compact big bore revolver, Rossi crafted the 5 shot medium frame Model 720 in stainless steel and a conventional single/double action trigger mechanism to handle the powerful .44 Special.

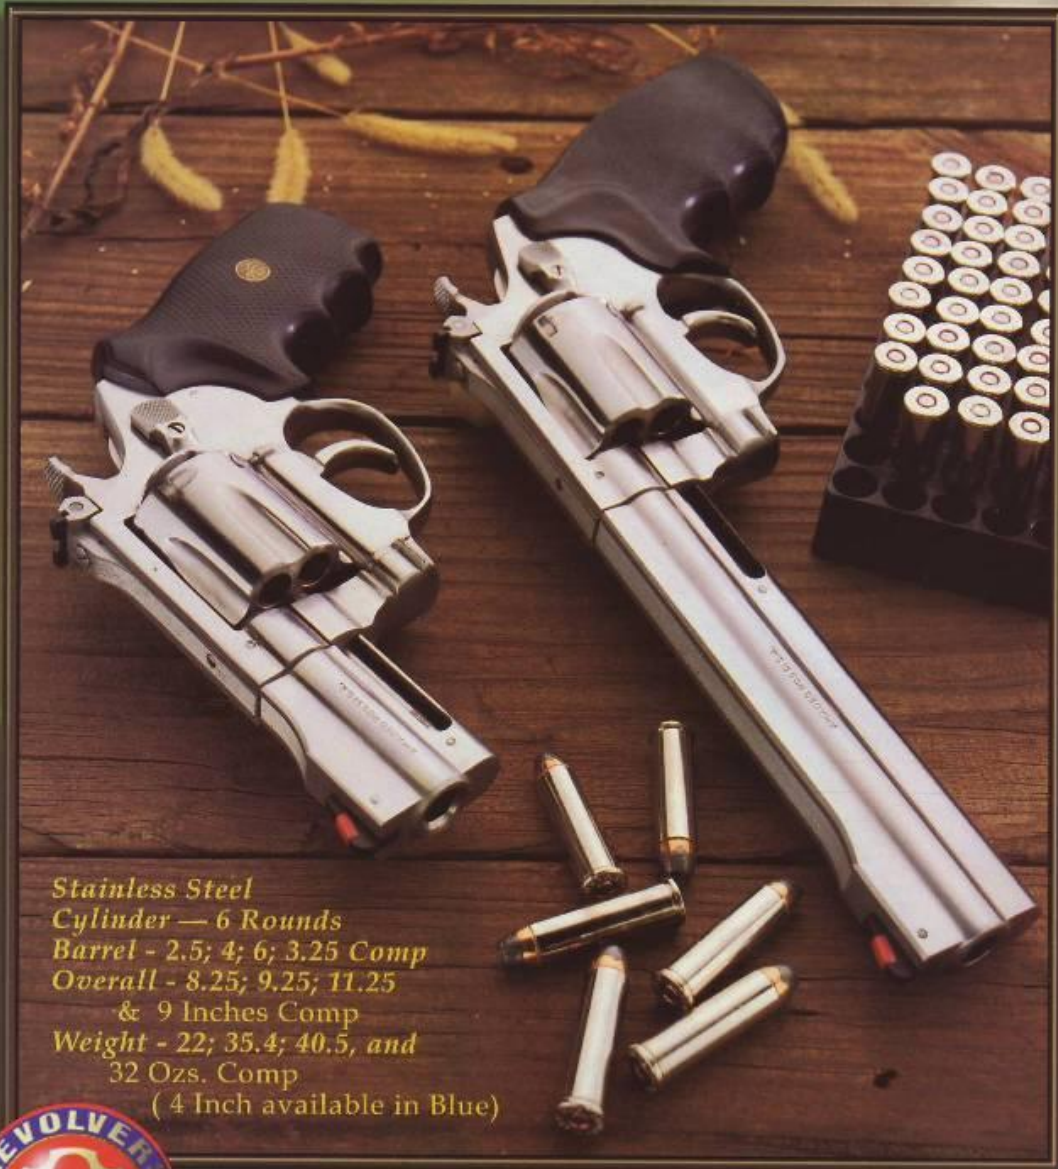

Consumer response exceeded all estimates! At the urging of the law enforcement community, Rossi has gone one step further with the production of the 720 double action only, with a non-slag, fully shrouded hammer.

Both models are produced with three inch barrels

featuring a full length ejector rod shroud. Custom, combat style grips for positive, non-slip control are standard.

The rear sight on the standard M720 is black and fully adjustable for elevation and windage. A square notch is highlighted with a white line. Front sights are black with a red insert. The M720 maintains a low profile contour by recessing a notched sight channel in the frame. It packs a lot of power in a compact package.

*Stainless Steel*  
*Cylinder — 6 Rounds*  
*Barrel - 2.5; 4; 6; 3.25 Comp*  
*Overall - 8.25; 9.25; 11.25*

*Weight - 22; 35.4; 40.5, and*  
*32 Ozs. Comp*  
*(4 Inch available in Blue)*

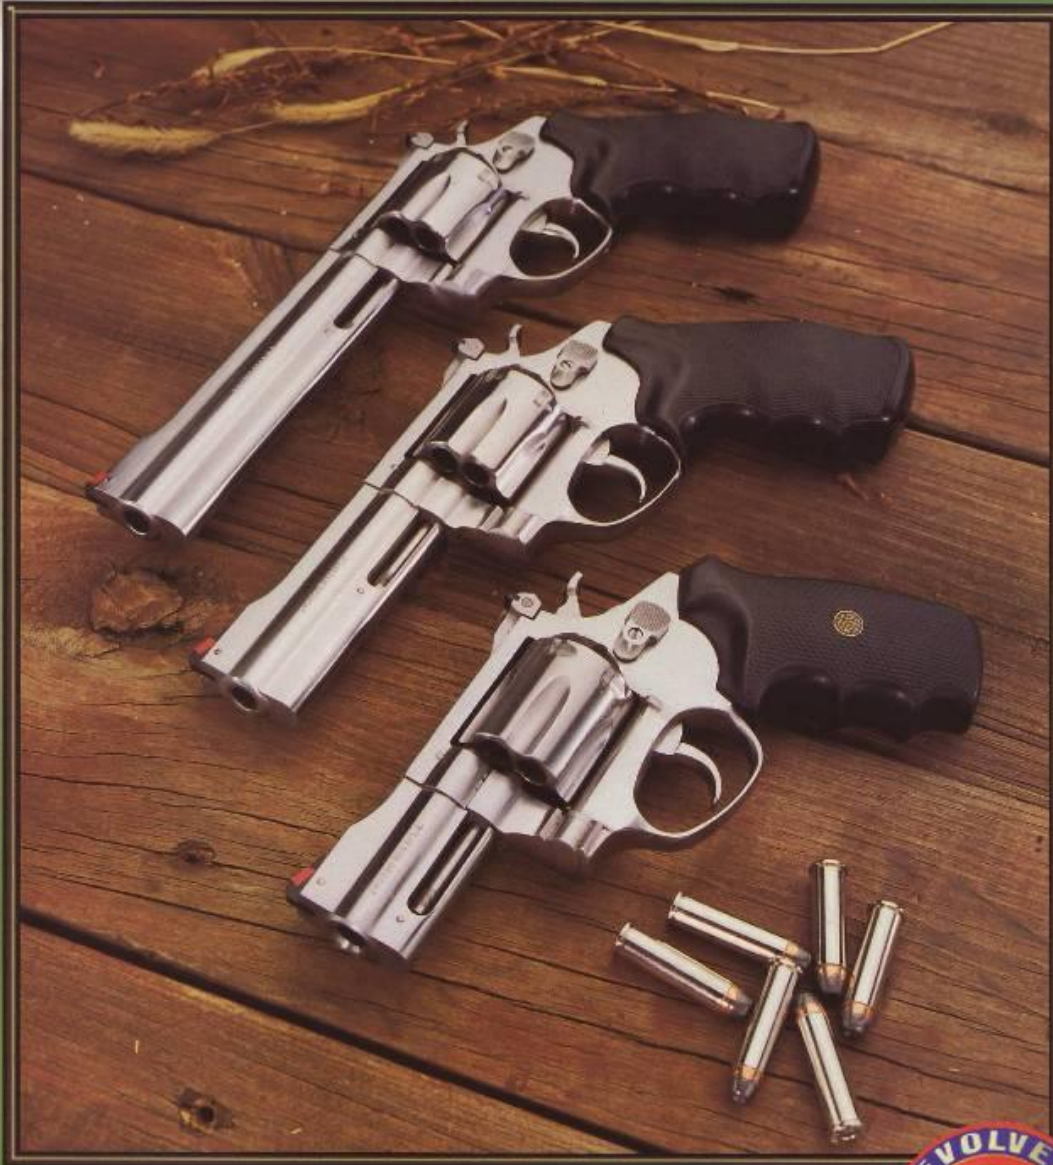

## MODEL 971 SERIES

### STAINLESS STEEL

**T**he ROSSI Model 971 Series offers the most design diversity. All are chambered for the versatile .357 Magnum cartridge (or the standard .38 Special) and offer a full range of barrel lengths to suit your preference. Considering the design, quality, top perfor-

mance and sensible price range, the 971 Series represents one of the best values on the market today. Note the similarities in the trim, medium frame styling to the S&W "L" frame design and carefully compare the prices and workmanship. . . . then you'll understand why so many choose Rossi.

## CAL. .357 MAGNUM

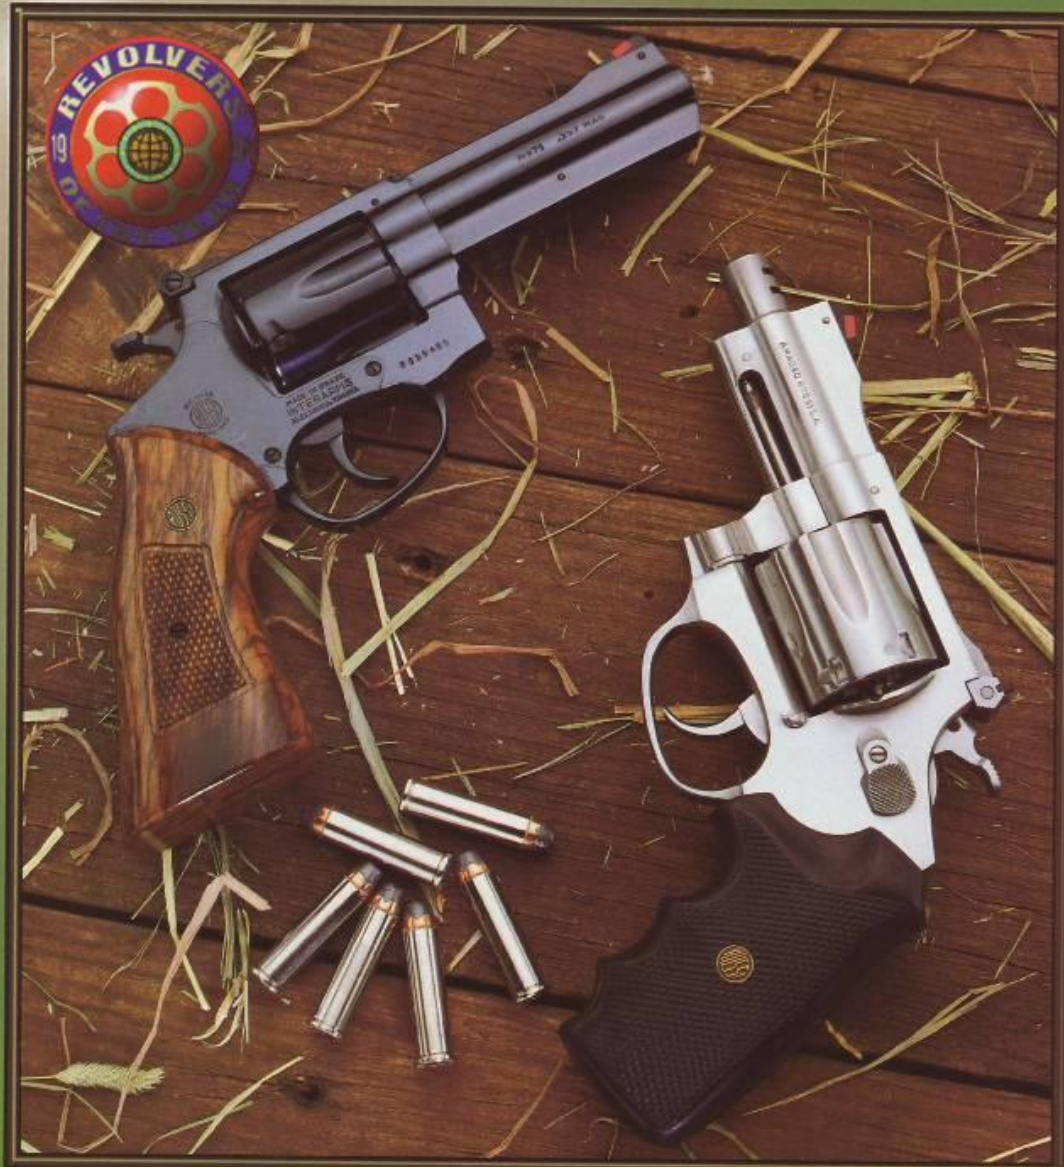

### CHECK THESE FEATURES

*Medium Frame Design Comparable to S&W "L" Frame Models.  
Chambers .357 Magnum or .38 Special.  
Integral Full Length Sight Rib and Ejector Rod Shroud.  
All Models Available in Rust Resistant Stainless Steel.*

*Blue Steel 4" Barrel Version Available with Checkered Wood Grips.  
High Contrast Target-Type Sights for Fast Target Acquisition.  
Fully Adjustable Rear Sight . . . Ramp Front Sight with Red Insert.*

## 971 SERIES .357 MAGNUM

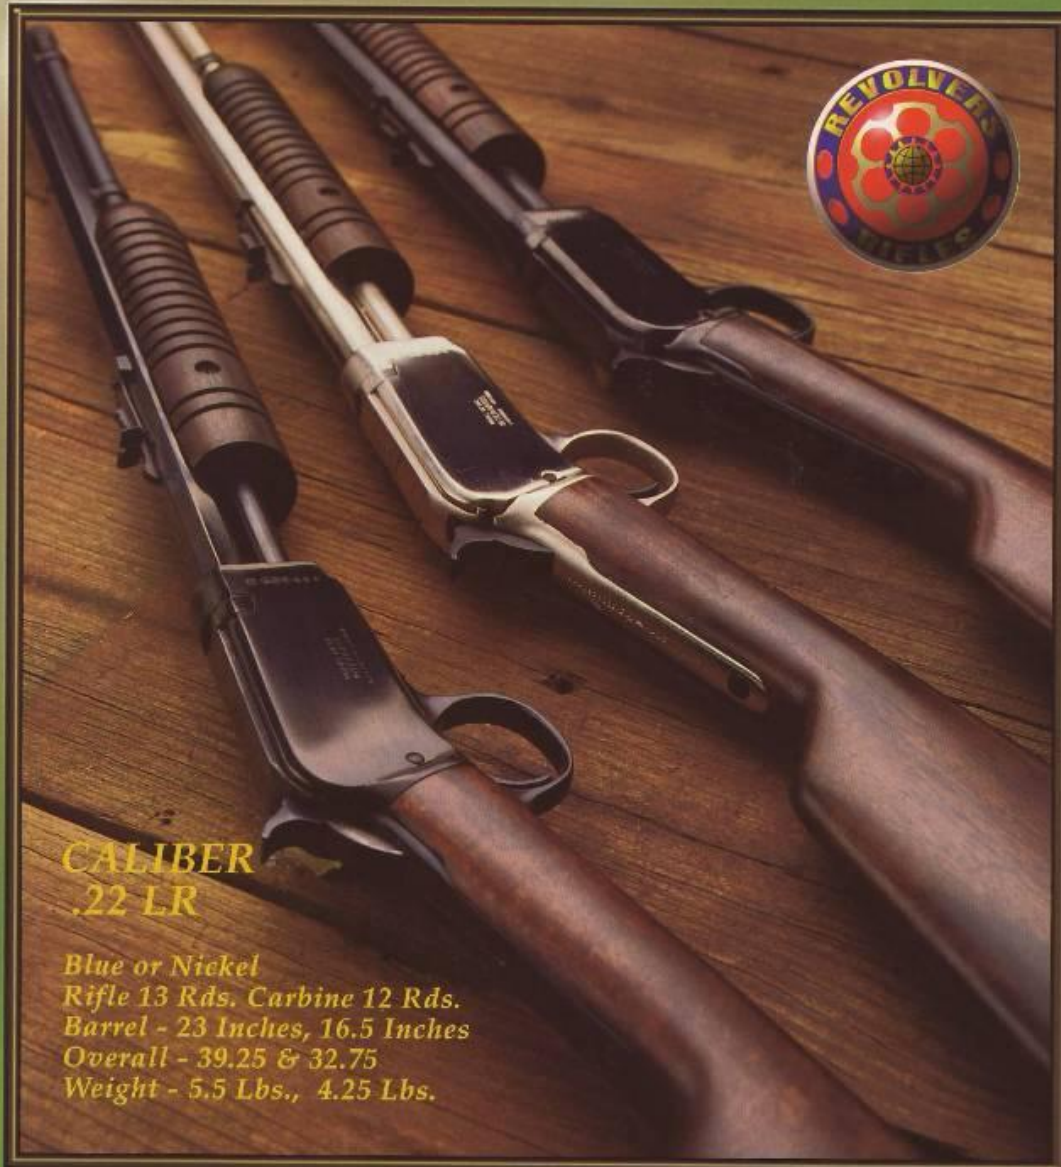

**T**HESE two round out the 971 Series. The blued version with its 4 inch barrel and checkered hardwood grips should satisfy the hard-core traditionalists who insist on the polished luster of rich blued steel and the elegance of highly figured wood. The stainless steel model may be new to you. That's the 971 "Comp". It's produced with an integral recoil compensator machined into the barrel. We've been told that it can help reduce felt recoil by as much as 25%! And, as with all stainless Rossi 971's, the Comp is

fitted with soft, contoured combat style grips to tame more recoil.

Both are outfitted with rear sights that are fully adjustable for elevation and windage and their ramp front sights feature a red insert; this, combined with the broad, striated, full length sight rib, provide an exceptional sight picture.

With the 971 Series, Rossi has just about covered all the bases . . . offering a wide range of barrel lengths to meet your requirements.

**CALIBER  
.22 LR**

*Blue or Nickel  
Rifle 13 Rds. Carbine 12 Rds.  
Barrel - 23 Inches, 16.5 Inches  
Overall - 39.25 & 32.75  
Weight - 5.5 Lbs., 4.25 Lbs.*

## GALLERY RIFLES & CARBINES

**Y**OUNG or old, beginner or trained hunter ... these grand old "Gallery Guns" have been the source of more pure fun than any other rifle. Your Great Grand-dad probably had one. Maybe your Dad taught you how to shoot with one. They go on forever, with their light weight, slick slide-action speed and reliability. As a "plinker", they're unequalled.

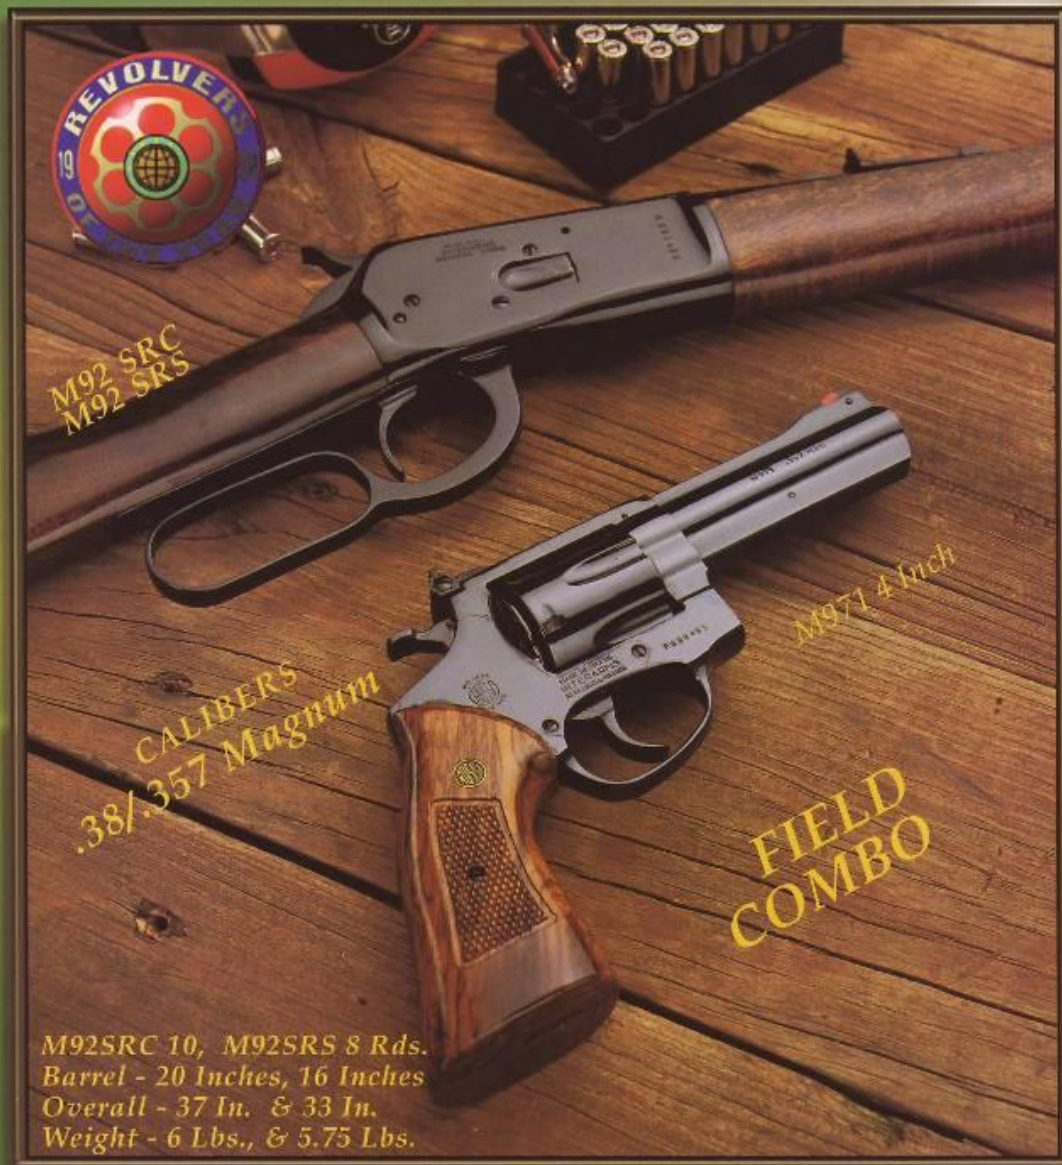

Choose either a rifle or carbine version - in a blued or nickel finish; or with Rossi's blued, special old style octagon barrel. Want more  
*M59SA - .22 Magnum - Blue - 10 Rds. - 23 Inch Barrel - 39.25 Overall - Weights 5.5 Lbs.*

power? Try the M59 chambered for the .22 Magnum cartridge - blued finish only.

Out for small game ... on a "tin can Safari" ... whatever your target, enjoy the pleasure and economy of .22 caliber rifles made by Rossi ... they're made to last a lifetime!

These are one of the few designs that have maintained their popularity for more than 100 years. These trim little .22s have taught more beginners correct gun handling, safety and marksmanship than any other. They're one of the best for that special "first" rifle.

## M92 CARBINES — M971 REVOLVERS

**H**ERE'S a natural pair for all real outdoorsmen, Rossi's .357 M92 SRC lever action carbine and the M971 .357 Magnum revolver. Your perfect field combination for fishing and hunting camps. The advantages of cartridge compatibility between a long gun and your sidearm are obvious. You don't need to drag along a lot of extra ammunition *and extra weight*. The .357 Magnum is suitable for some medium

sized game . . . certainly enough to keep the cook pot boiling. The M971 revolver is a natural, and recommended, adjunct.

Don't forget, both of these Rossi's are right at home with .38 Special cartridges too . . . that's another plus factor that Rossi owners enjoy. The Rossi Field Combo; keep them in mind the next time you take to the woods. They're ready to go anywhere . . . and they go together. Why not go in style—go with Rossi.

## LEVER ACTION EXCELLENCE

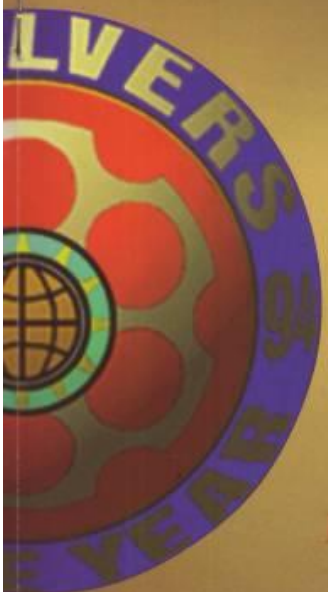

ONE OF the best firearms designs to ever come along. The old standby lever action. Known and used worldwide, but always considered uniquely "American". There aren't many firearms designs that have lasted well over one hundred years. Rossi has maintained the trim lines and crisp lever action speed that made them so popular as "brush guns". They're built for speed and fast tracking in any terrain. You'll really appreciate their light weight for real carrying comfort . . . they'll add many "easy" miles to

your hunting range and they're "easy" on cost. This year you have a choice of *four* calibers for your lever action. You're most likely already familiar with the Rossi chambered for the .357 Magnum (or .38 Special) and the hard hitting .44 Magnum. Now you can add to these the old west favorites—44/40 & .45 Long Colt. As the popularity of old west reenactment groups grew, Rossi was swamped with requests for their 92 carbine in these two old timers . . . Rossi came through. You'll be seeing a lot of them around.

TAKE A GOOD LOOK AT THE ROSSI FAMILY OF FINE FIREARMS

**H**ERE, at last, is the one you've been waiting for! A compact double action pistol chambered for a serious caliber ... plus an all-new design with an all new light weight polymer frame ... *and two magazines!* It's made by STAR, the one company you can always count on to keep coming up with innovative new pistol designs. (Four in the last two years)!

The new Ultrastar incorporates the design refinements requested by real professionals ... the international law enforcement community ... a slim profile, light weight and first shot, double action speed second to none!

The use of polymers is not new to the arms industry, but Star's designers showed real creativity. They produced a pistol that takes advantage of the strength and durability inherent in modern polymers and still manages to look like a gun ... not something carved out of soap! This one has class.

Other features include a triple-dot sight system, a windage adjustable rear sight, ambidextrous three position manual safety and all steel barrel and slide mounted on rails inside the frame. See your Dealer soon to insure early delivery of your ULTRASTAR.

**NEW FOR '95**

*Barrel — 3.39 Inches*  
*Overall — 6.5 Inches*  
*Weight — 30.35 Ozs.*

**FIRESTAR PLUS**

**T**HE FIRESTAR swept the industry like a firestorm! Well, if you thought the Firestar was great . . . just wait 'til you get hold of the FIRESTAR PLUS! You'll be sold. The enlarged magazine capacity and its light weight alloy frame gives you real carrying comfort . . . features you asked for. The FIRESTAR PLUS features a hand filling grip for real control, a fast button release magazine and an ambidextrous easy-view safety. And that's not all: take your choice of either a

blued finish or the elegant STARVEL electroless nickel finish. Add to this a triple-dot sight system (the most popular in the industry), Stars' tight-lock 'Acculine Barrel' for constant, positive barrel/slide alignment. Further, the all steel slide glides on internal rails machined *inside* the frame. And all this is accomplished in a compact pistol that's about the size of a Walther .380 PP!

That's a lot of pluses that all add up to what just may be the finest pistol you'll ever own.

**CALIBER  
9mm PARABELLUM**

**CALIBER  
.40 S&W**

*Blue or Starvel  
Capacity — 6 Rounds  
Barrel — 3.39 Inches  
Overall — 6.5 Inches  
Weight — 30.35 Ozs.*

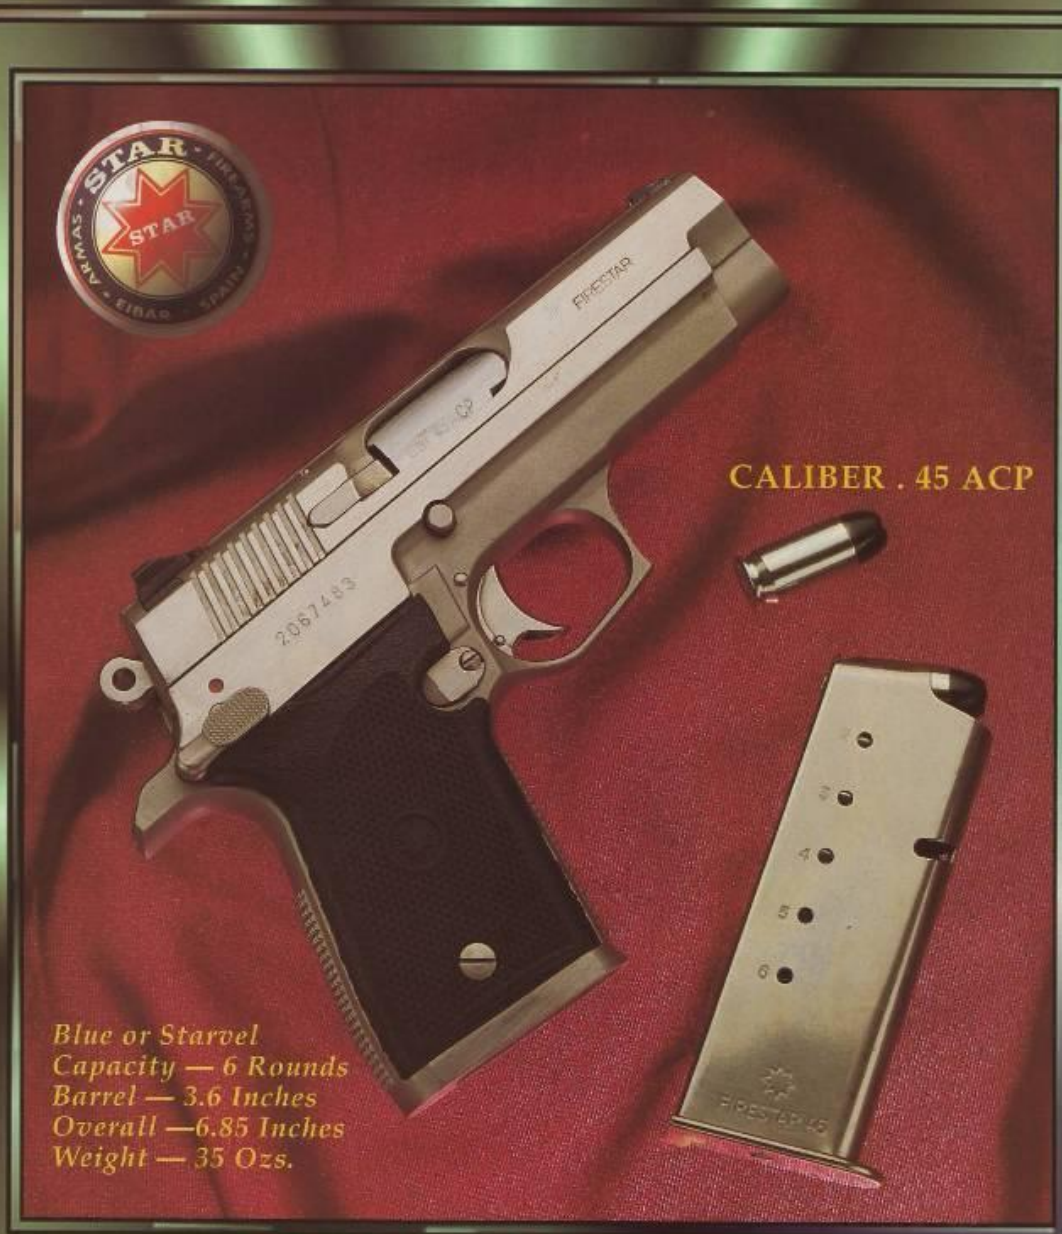

## M43 & M40 FIRESTAR

The Firestar Series is the first and only line of really compact production hand guns to handle big bore pistol cartridges. Introduced in caliber 9mm Parabellum and quickly followed with the Model 40 chambered for the .40 S&W round. Both were an overnight success ... and were voted "Handgun of the Year for 1993" by The American Firearms Industry and the National Association of Federally Licensed Firearms Dealers. We appreciate their endorsement.

Each Firestar features the reverse tapered Acculine barrel that's buttressed with four hefty locking lugs for precise and consistent lock up.

Remember, all these features—plus those on the following page—are packed in an ultra compact, all steel pistol about the same size as the diminutive Walther PPK in .380 ACP.

## M45 FIRESTAR

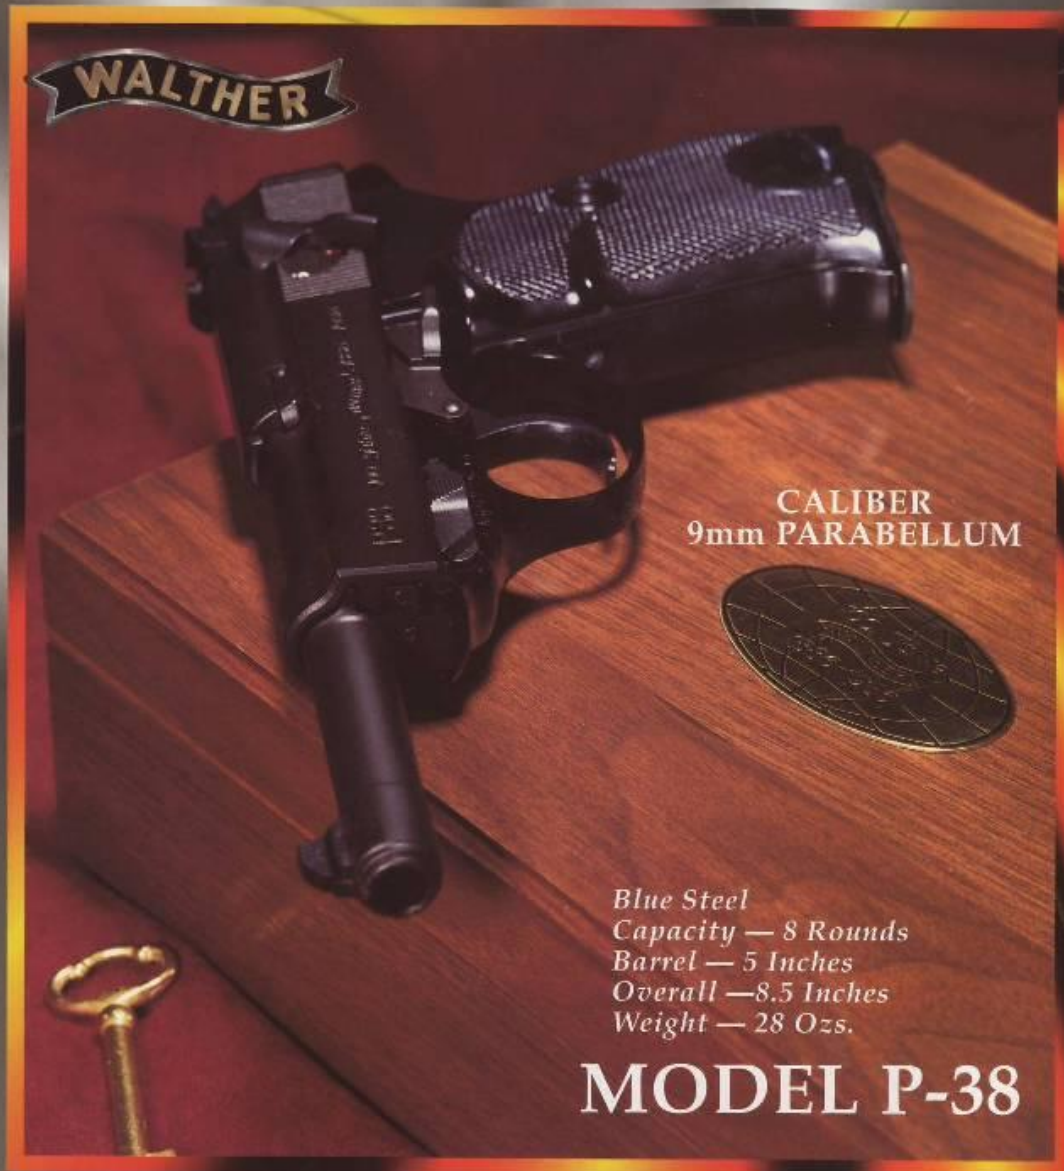

ONE of the most eagerly awaited additions to the Firestar family was the M45 chambered for the venerable old war horse - John Browning's rough and ready caliber .45 ACP. A natural for law enforcement—whether undercover, off-duty, or for the home and your personal security. Slightly larger than the 9mm and .40, the M45 shares all the features including: an ambidextrous frame mounted safety that locks both the hammer and firing pin; triple dot sights for rapid target acquisition; combat style trig-

ger guard for rigid, two hand grip; all steel frame and slide; traditional blue or "Starvel" electroless nickel finish; and resilient, non-slip polymer grips.

Firestars offer more quality design innovations than you'll find in other pistols. If that's not enough, consider their sensible price in a market crowded with overpriced copies that deliver far less.

Ask to see the ultra compact Firestar . . . and see how award winning pistols are made.

**CALIBER**

Capacity — 8 Rounds  
Barrel — 5 Inches  
Overall — 8.5 Inches  
Weight — 28 Ozs.

## MODEL P-38

*Supplied With Two Magazines*

**W**ITHOUT a doubt, the Walther P-38 is the most significant pistol design of the twentieth century. The switch from old frontier six-shooters to sophisticated auto loaders began with three early classics. The first commercially successful pistol was the 1896 Mauser ("broom handle") followed by Georg Luger's classic P08 and John Browning's 1911...and then came Walther and the double-action combat pistol was born....pistol designs have never been the same.

The P-38 is the world's first successful, heavy caliber, double-action pistol. A design so well

conceived and perfectly executed that it is still in production... *still being copied*... over half-a-century after its introduction!

These P-38s bear slide markings commemorating Walther's recent 100 year anniversary and, like other P-38s, will undoubtedly become collectors items. In recognition of their historic importance, each P-38 is now delivered with a velvet lined walnut presentation case — complete with brass lock and key— *yours at no additional charge!*

The legendary P-38 a living piece of history, a pleasure to shoot or show... a legend you can hold in your hand.

**Blue Steel**  
Capacity — 7 Rounds  
Barrel — 3.8 Inches  
Overall — 6.7 Inches  
Weight — 23 Ozs.

CALIBER  
.32 ACP & .380 ACP  
**MODEL PP**

## DOUBLE-ACTION .32 & .380 ACP

*Supplied With Two Magazines*

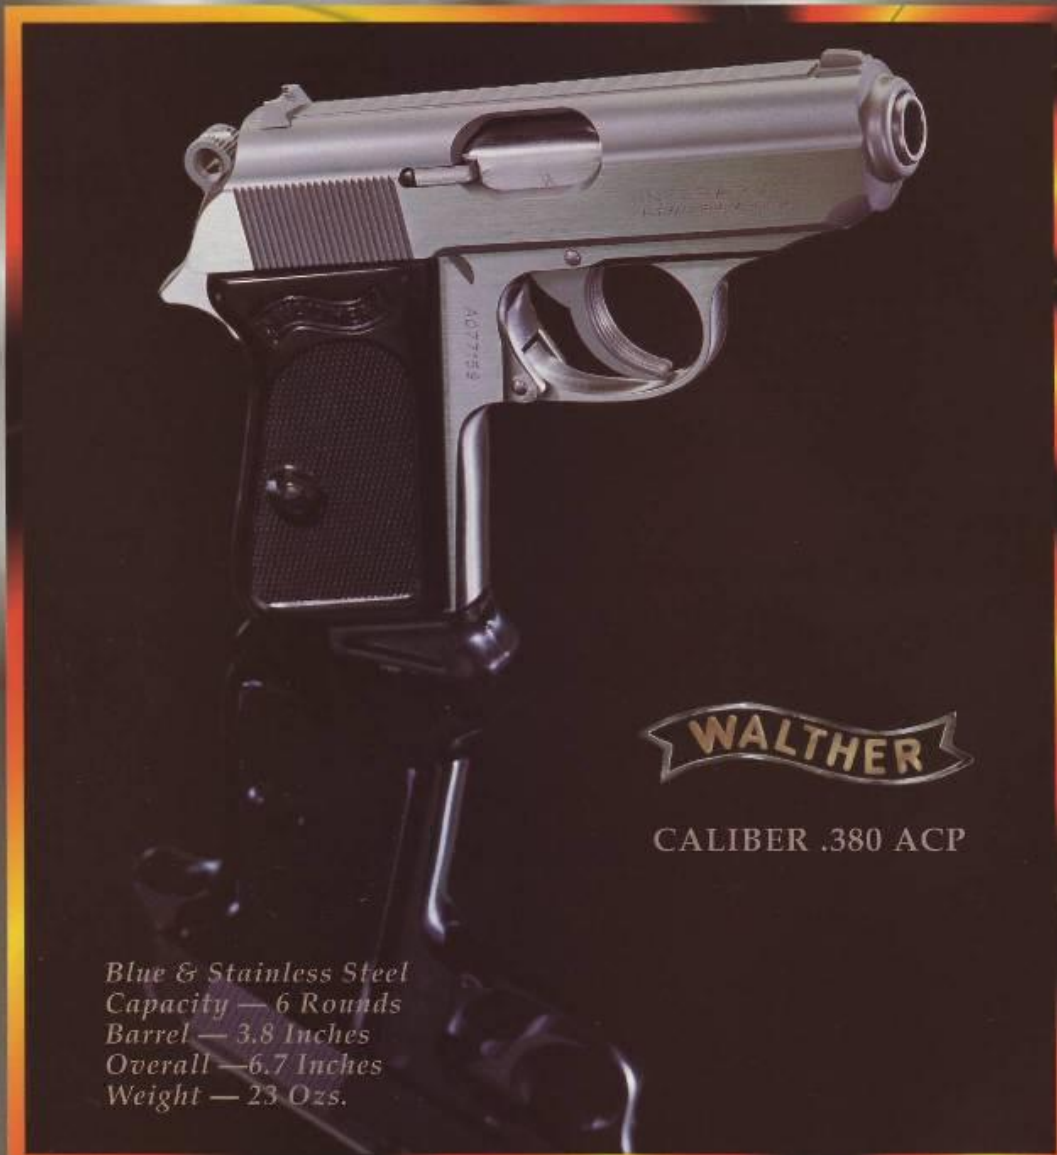

**T**HE WALTHER PP . . . the pistol that started the switch to double-action more than half-a-century ago. With this model, the first commercially successful double action, Walther established a standard of performance that other manufacturers hesitated to challenge until almost twenty years after Walther set the pace.

From its inception, the Model PP has been renowned for its crisp double-action excellence. Favored by professional lawmen, dip-

lomats and military officers, owners of the Model PP have always been ranked among the elite within the shooting fraternity.

Still made in Germany, you can rely on the rigorous, uncompromised German quality control and performance worthy of the famous Walther Banner. Like a Mercedes, they're not meant for everybody, but if you're ready to move to the top of the class . . . there's nothing that exhibits more class than the Walther Model PP.

**WALTHER**

CALIBER .380 ACP

*Blue & Stainless Steel  
Capacity — 6 Rounds  
Barrel — 3.8 Inches  
Overall — 6.7 Inches  
Weight — 23 Ozs.*

## WALTHER MODEL PPK

*Supplied With Two Magazines*

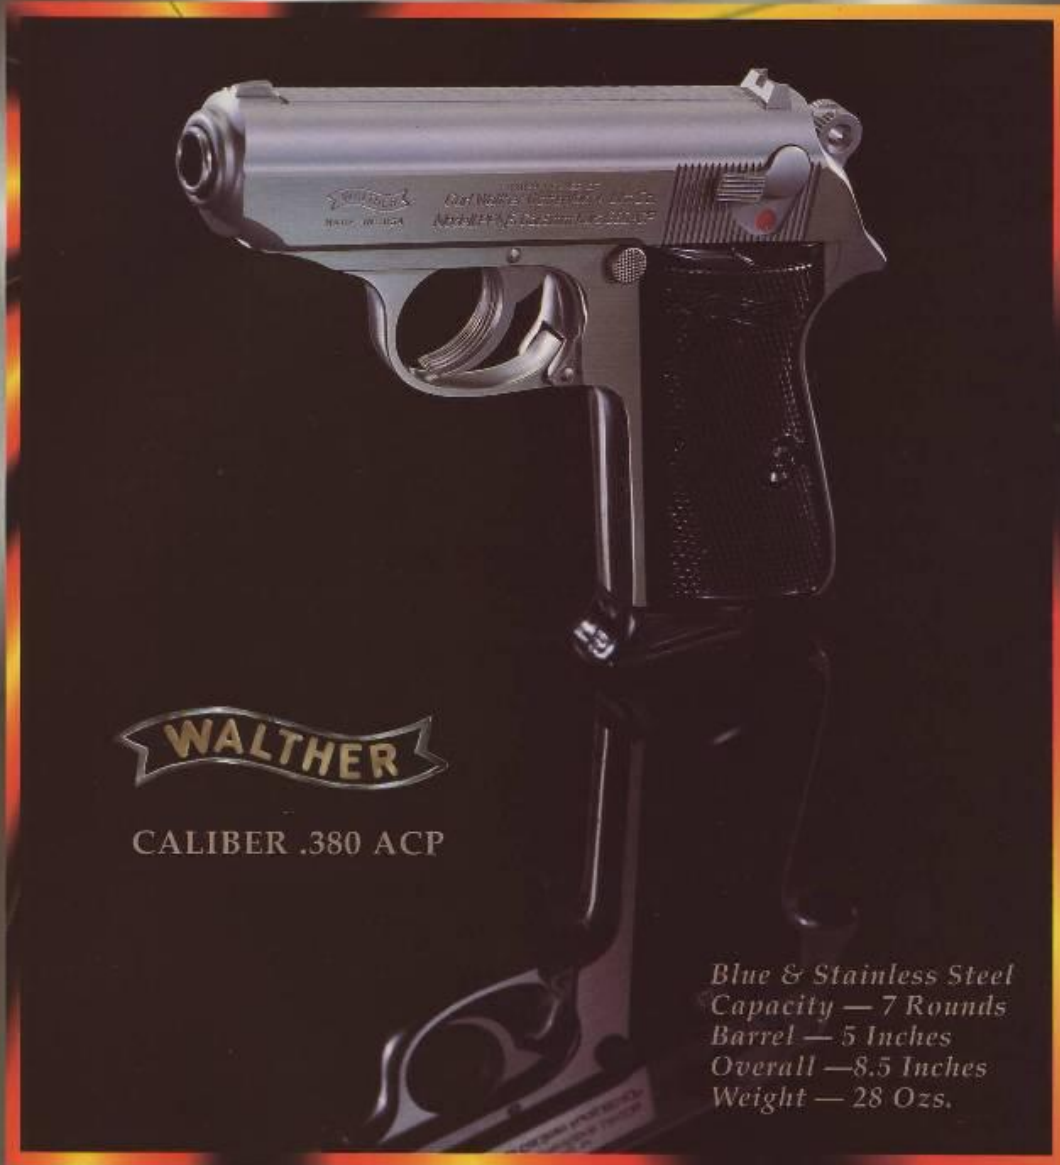

**H**ERE are two all time legendary arms that made their mark all around the world. It's been said that they're "unseen in the best places" . . . . anyplace where there is VIP security. . . .with Presidents, Kings and Prime Ministers . . . you won't see them, but a PPK will surely be part of the security team, quietly alert, somewhere in the crowd.

Why? Because Walther pistols are so well de-

signed and so trusted for their constant readiness and consistent reliability, that the real professionals in the covert services rely on them when the chips are really down. And don't forget, it was James Bond's choice!

Obviously, Walthers keep good company. And that's something to keep in mind when you're shopping for a pistol to provide personal protection for yourself and your family.

**WALTHER**

CALIBER .380 ACP

*Blue & Stainless Steel  
Capacity — 7 Rounds  
Barrel — 5 Inches  
Overall — 8.5 Inches  
Weight — 28 Ozs.*

## WALTHER MODEL PPK/s

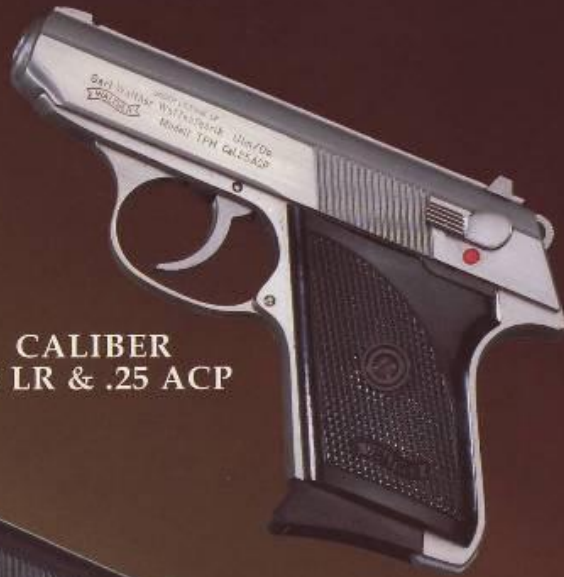

*Supplied With Two Magazines*

**W**HAT is it about these two Walthers that makes them so special? Maybe it's the elegant, compact styling; or light weight carrying comfort; or, perhaps, the incredible balance and instinctive aiming characteristics built into every Walther. It may be the look of sleek, uncompromised efficiency, or the just right feel in your hand. Whatever the reasons, you'll know, when you

hold one, that you're not likely to find another pistol like it again anywhere!

Today, we build them in the U.S.A. You have your choice of rich blue or stainless steel in either model. We kept the same high quality that you have learned to expect in a Walther ... and we kept the prices sensibly low for so much value. You're faced with a difficult choice. . . PPK or PPK/s. . . you can't go wrong.

**WALTHER**

CALIBER  
.22 LR & .25 ACP

## WALTHER MODEL TPH

**F**INEST compact handgun ever made! Considered the ultimate hideaway, undercover, backup gun available anywhere. Used with confidence by government agents and law enforcement officers around the globe.

A scaled down version of Walther's incomparable PP-PPK Series chambered for calibers

.22 LR and .25 ACP. Produced in traditional blue or stainless steel and made in the U.S.A. Here's positive double action excellence in the famous Walther tradition. Made with modern technology, American materials, technical expertise and manufacturing precision. The Interarms Walther TPH ... it's becoming an American tradition.

## WALTHER P5 & P5 COMPACT

*Supplied With Two Magazines*

EUROPEAN security forces were quick to recognize the design advantages and high level of performance exhibited by the Walther P5. It's still one of the most popular 9mm police pistols on the Continent.

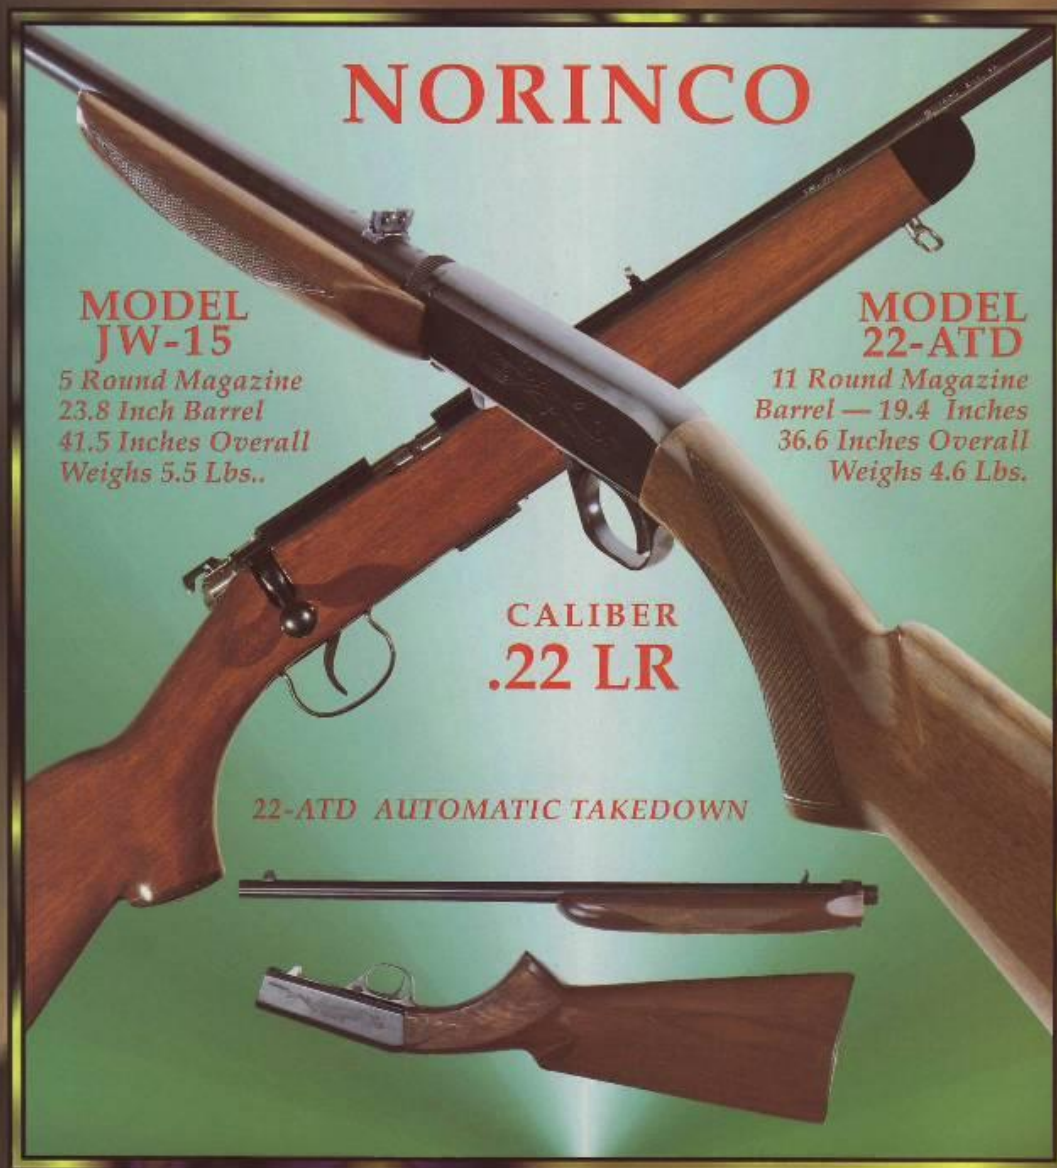

The P5 proved so dependable that security agencies urged Walther to refine the P5 still further for the special requirements of concealed carry and instant response . . . and the P5 Compact was born.

Sleeker, shorter and lighter - the P5 Compact

conceals and controls like the thoroughbred the Walther name implies. An 8 + 1 cartridge capacity is more than adequate for the skilled; and the single column magazine allows a thinner profile and gives the P5 and P5 Compact grip dimensions that seem to fit all hands.

Walther's reputation for uncompromised quality and attention to detail still stands. Should you need proof, you only have to take a look at the P5 and the P5 Compact.

## NO. 4 BRITISH LEE-ENFIELD

**D**ON'T confuse the famous No. 4 Lee-Enfield with the tired old WWI-vintage Rifle No. 1 Mark III. These are the latest *and last* of the Enfield series. They served with honor and distinction with British forces from the *D-Day* landings on the beaches of *Normandy* right up until the adoption of the Belgian designed FAL.

They're rated by battle-wise veterans as the fastest, most rugged bolt-action military rifle ever made. The No.4 Lee-Enfields feature a stronger action and heavier barrel for long life and improved accuracy.

Interarms No. 4's are not to be equated with the war-weary, hand-me-down re-works from some Third World militia as imported by others. These are genuine British Commonwealth issue—and all were drawn from active war reserves—in a condition *and at a price* that finally eliminates the worry and quesswork in buying military surplus arms. Get the best. Insist on an "Interarms" No. 4 Lee-Enfield.

## DISTINCTIVE ACCESSORIES

### RUGGED OUTDOOR GEAR WITH EMBLEMS OF WORLD'S TOP ARMS COMPANIES

These attractive, comfortable jackets were originally offered as premium items in our special promotions. The demand exceeded all projections and we were swamped with orders. We received literally thousands of requests to purchase the jacket alone. So, here they are. This is a first for Interarms.

*Article the second . . . .*

*A well regulated militia, being necessary for the security of a free State, the right of the people to keep and bear arms shall not be infringed.*

**W**e have intentionally repeated the above excerpt from our Bill of Rights because it's well worth repeating and it's something you should always remember.

Today, our Constitution and the Bill of Rights are increasingly under attack. There are revisionists who would amend and modify them to strip us all of guaranteed protection from government excess.

The Second Amendment has been the particular focus of zealots who insist that these words apply to another time and other circumstances. Preliminary drafts, and supporting documentation to these articles, prove them wrong.

The founding fathers, unlike the current crop of legislators, considered and chose their words carefully. And they meant just what they said.

They saw no danger, nor should we, in the ownership of firearms *by law abiding citizens*.

Since you're reading these lines, we assume you agree with our Constitution—*especially the Bill of Rights*.

It's important that you get involved in the protection of these, and other rights, guaranteed to you as a citizen of the United States.

Push for the enforcement of existing laws directed to the criminal use of firearms. Join and support the NRA and your local groups that work to protect your rights, your freedom and personal property.

Contact your State and local Senators and Representatives and let them hear your concerns.

The time for your action is now—and your voice *is* important—and the preservation of the Second Amendment *is* important to us all!
